INFO2604: Group Project
Weighting: 9%

Date Released: March 17, 2026 @ 11:59 pm

Date Due: March 7, 2026 @ 11:59 pm

Objectives:

The overall objective of this project is to facilitate a deep, collaborative understanding of biometric techniques while developing research, communication, and digital media skills.

Instructions:

1. Students are to organize themselves into groups of four.
2. Each member of a group is expected to research a different biometric technique.
3. Once this research is completed members of the group are expected to meet privately and present their findings to the group.
4. Each group will create a ten-minute video on the researched goals and components listed in the Table below.

Biometric Technique	
Goals	Components
Universal, Distinguishing, Permanent, Collectible, Uniqueness, Acceptability, Performance.	The Sensor or Image acquisition module, Preprocessing module, Feature extraction module, Matcher module.

The video will consist of two (2) minute clips from each member. Each group member is responsible for discussing their presented biometric technique for no more than two (2) minutes. The group member would discuss one goal and one component of the biometric technique. The goals and components must be unique for each group member. This would account for 8 minutes of the video:

$$4 \text{ members} * 2 \text{ minutes/member} = 8 \text{ minutes.}$$

The content of the final two (2) minutes of the video is described below:

At the end of the video the group leader should compare the four (4) biometric techniques in terms of vulnerability to spoofing attacks, accuracy, cost and social acceptability.

Students are not allowed to use cards or written material during their presentation. There should be no prompting from other group members. All students **MUST** play a part in the presentation. Submissions should include the names and ID numbers of all contributing group members.

Submission Requirements:

Only the group leader submits the group ten (10) minute video. This should be shared via a hyperlink to an online storage drive, for example Google Drive.

Each group member including the group leader **MUST** upload on myeLearning a reflective journal of the day-to-day activities and experiences from group meetings, discussions and decisions made pertaining to the project.

Note that the group is allowed to use any presentation technique (role plays, skits etc..) in their video.

END OF GROUP PROJECT
